

Could your staff benefit from extra help with time-consuming maintenance tasks?

E-Tech makes it easy!

Trusted Experience. Innovative Solutions. Unparalleled Service.

E-Tech

Performing routine maintenance is vitally important to the overall health of your information system. However, if this task is assigned to staff with other important responsibilities, it can often take a back seat. Hiring additional staff to conduct routine maintenance and administration for your network, however, may not be cost effective.

Experior's **e-Tech** service delivers the best solution for performing regularly-scheduled IT maintenance accurately and on time. This valuable benefit lets your staff focus on other tasks that are vital to your business.

e-Tech will:

- Install Experior updates to your system
- Download the latest help files to your server
- Provide monthly database maintenance (log file sizing, re-indexing, etc.)
- Ensure scheduled tasks are completed
- Monitor disk space
- Perform a monthly defrag
- Perform a monthly scandisk
- Perform server's check configuration and monitoring
