

eBusiness Manager

ExpertPM e-Business Manager allows you to reduce AR days, improve cash flow, and make a dramatic impact on your surgery center's performance by automating the patient and insurance collection process.

The collector review screens serves as a collection worksheet for contacting accounts and updating activity. Each account automatically queues for review and prompts the collection specialist to enter an action code before reviewing the next account.

ExpertPM e-Business Manager also allows you to e-mail statements and messages to patients and insurance carriers to expedite and improve collection tasks. By managing your accounts receivable in-house, you can improve your healthcare center's collection rate, eliminate costly agency commissions, and increase revenues. The **e-Business Manager** module is integrated with **ExpertPM** to provide a comprehensive practice management solution for both large and small healthcare centers.

Trusted Experience. Innovative Solutions. Unparalleled Service.

Highlights Include:

- Electronic patient collection queues
- Electronic insurance claim queues
- Extensive notes capability
- Full reporting
- Only work unresolved issues
- Single-screen collector "worksheet"
- Improves collections efficiency
- Decreases AR days
- Customized letter and form generation
